RESEARCH INTERESTS

My research focuses on American Politics, Law and Society, and Race and Ethnic Politics. I am interested in normative and empirical approaches to institutions, representation, and criminal justice. In 2022, the National Science Foundation awarded funding for my proposal CAREER: We Dare Defend Our Rights: The Political Use of Law in the Enforcement of Voting Rights. NSF identifies this five-year, \$500,000 integrated research and teaching award as its most prestigious award for early-career scholars.

BOOK PROJECT

The Alabama Democratic Conference (ADC) is arguably the United States’ most successful political organization when it comes to the use of law for political purposes. As such, it offers an excellent case study for examining the vital—yet understudied—question of how organizations can capitalize on available support structures for legal mobilization to successfully overcome systematic oppression. Based on data, I have collected and analyzed, I investigate how this minority political organization sustained a statewide legal campaign for over twenty years (1965-1989), eventually achieving the most successful political usage of law in American history in service of enforcing voting rights. The central question then arises: what institutional, ideological, and/or instrumental features of the ADC account for its unique success relative to other civil rights organizations? I postulate that the causal factors include: the social context relative to other states; the ability of the ADC to build statewide strategic capacity relative to other organizations within the same social context; and its ability to effectively capitalize on the support structure for legal mobilization relative to other organizations within the same social context. This study of the ADC offers broad theoretical and practical implications for the study of political organizations and their relationship to legal structures.
